July 10, 2024

Mr. Scott Woodruff
2024 Mortimore Ln
Lander, WY 82520

Dear Mr. Woodruff:

Please find attached the final “Brief on South American Camelid Disease Risk to Wild Sheep.” The Western Association of Fish and Wildlife Agency’s (WAFWA) Wildlife Health Committee and the Wild Sheep Initiative prepared this brief. This final version addresses many of the concerns you brought forward this past spring. Please understand that after careful consideration, the WAFWA Directors and the Executive Committee agree with and approve the assessment and recommendations made in this brief.

This brief provides reasonable best management practices and a path forward. It will remain the final, until further data are available to make any changes appropriate. This final version will not be posted on the WAFWA website, but it will remain a ratified and approved WAFWA document that will be made available to whomever requests it.

Regards,

Dr. Zach Lowe
Executive Director
